PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of hands-on experience designing CI/CD pipelines, containerizing microservices, and building observability stacks for production environments. Migrated 25+ projects to GitLab CI/CD - cutting deployment time by 60%. Proficient in Docker, Kubernetes, Terraform, and AWS with a strong foundation in infrastructure automation, DevSecOps integration, and centralized monitoring. Passionate about building reliable, scalable, and secure cloud-native systems.

TECHNICAL SKILLS

CI/CD & Automation	GitLab CI/CD, GitHub Actions, Jenkins
Containers & Orchestration	Docker, Docker Swarm, Kubernetes, Docker Compose
Infrastructure as Code	Terraform, Ansible, Bash, Python, YAML
Cloud Platforms	AWS (EC2, VPC, Lambda, IAM, S3, CloudWatch)
Observability & Monitoring	Prometheus, Grafana, Loki, New Relic
Security & Code Quality	SonarQube, Snyk, VAPT
OS & Version Control	Linux (RHEL, Debian, Ubuntu), Git, Nginx

PROFESSIONAL EXPERIENCE

Project Engineer - DevOps

Nov 2022 - Present

C-DAC: Centre for Development of Advanced Computing

Pune, India

- Migrated 25+ projects from manual deployment to GitLab CI/CD pipelines, reducing deployment time by 60% and eliminating manual release errors across multiple teams.
- Integrated SonarQube and Snyk into CI/CD workflows, enforcing automated code quality gates and reducing security vulnerabilities by 30% before production.
- Containerized multiple microservices applications using Docker and Docker Swarm, improving deployment consistency and resource utilization by 40%.
- Architected a centralized logging & monitoring stack (Prometheus, Loki, Grafana) serving 15+ Spring Boot services, reducing mean-time-to-detection (MTTD) from hours to minutes.
- Developed a full-stack Bash provisioning script automating CDAC's ePariksha deployment - Java, Tomcat, PostgreSQL setup, database backup/restore, and cross-platform compatibility (RHEL & Debian) - reducing provisioning time from hours to under 30 minutes.
- Designed & implemented production architecture for ACTS Website & PMS portal, achieving near-zero downtime during migration and serving 5,000+ concurrent users.
- Deployed and maintained a critical Payment Administration Service on-premise (Java microservices, PostgreSQL, Node.js, Keycloak IAM, Nginx), proactively remediating internal & external VAPT findings.
- Standardized Git branching strategies and merge-request workflows across development teams, improving collaboration and reducing merge conflicts by 50%.

CSA & SME

Jul 2018 - Mar 2021

Amazon

Pune, India

- Leveraged strong technical communication skills to translate complex issues into actionable solutions for end-users.
- Led peer training initiatives, improving overall team performance metrics and decreasing new hire onboarding time by 25%.

KEY PROJECTS

K8s Cluster Intrusion Detection with Splunk - Deployed Snort IDS on AWS-hosted Kubernetes cluster with Splunk dashboards for real-time threat monitoring and alerting.

Centralized Microservices Observability - Built a Syslog + Prometheus + Loki + Grafana stack providing unified metrics and log visualization across 15+ containerized services.

Blackbox-Lite - Lightweight Bash script to monitor websites and VM hosts, exporting Prometheus-compatible metrics via Node Exporter.

EDUCATION

Post Graduate Diploma , IT Infrastructure, Systems & Security CDAC - Centre for Development of Advanced Computing, Pune	2022
---	------

Bachelor of Engineering , Information Technology PVPIT, Sangli - Shivaji University	2018
---	------

CERTIFICATIONS & CONTINUOUS LEARNING

- Docker Mastery: with Kubernetes and Swarm [*Udemy*]
- GitLab CI: Pipelines, CI/CD, and DevOps [*Udemy*]
- Bash Mastery [*Udemy*]
